# What affects my choices about money?

## Activity sheet

Cut out the following role-play cards. They explore some of the different factors that affect people's choices about money.

**Role-play cards**

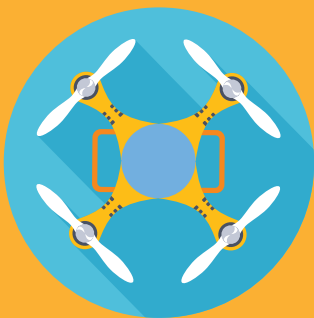

### You are the customer

You have received £20 as a birthday gift and are trying to decide what to do with it. Ask the people in your group to help you decide.

### You are the customer's parent

You would like to persuade the customer to save his or her money instead of spending it.

### You are the owner of a toy store

You have a new remote control drone costing £25, and you want to sell as many as possible. You're prepared to give the customer a discount and sell the drone for £20.

### You are a fundraiser for a local charity that supports sick animals

Your aim is to get the customer to donate as much money as possible to your cause.

### You are the customer's best friend

There's a movie that you really want to see and you'd like the customer to spend some of their money on seeing it with you... and buying popcorn! The cinema trip will cost £10.
