### **Pobble 365**

This has a picture a day with questions linked to the picture for children to answer and explore. Children can also use the story starter to plan, draft, edit and publish their own story.

<https://www.pobble365.com/watchwood-forest>

Sport and being physically active is really important to help us grow as individuals and develop healthy lifestyles. Sports can help you with many skills, such as:

- Teamwork – learning about how to work in a team and be a team player is very important and a skill children need in many aspects of life.
- Communication – it's great for young children to practise and develop their communication skills in a sporting context.
- Social Skills – school sports provide excellent opportunities for children to work with their peers and socialise with others.
- Resilience and perseverance – sports are about finding your strengths and weaknesses, learning how to be a graceful winner, how to cope with losing, and how to improve your personal bests.
- Concentration – sports provide the perfect context in which to learn about the importance of concentration. If you don't concentrate you won't catch the ball or get from one end of the balance beam to the other.
- Health and Fitness – keeping children fit and healthy is at the heart of what teachers aim to do. Providing opportunities for children to part in regular sports and exercise is key.

Using the information above research how these skills can help you in the future. For example getting a job or having your own friends. Research how you could continue to develop the skills above and find an athlete that has shown skills in these areas. How did they get to where they are now?

## **Year 5 Maths**

**Year 5 Maths National Academy – Weekly Schedule.**

Work for the 13th July is released on Sunday 12<sup>th</sup>-

<https://classroom.thenational.academy/subjects-by-year/year-5#schedule>
